UNA CERAMICA CHE ARRIVA DA LONTANO

A COMPANY WITH A LONG HISTORY
EINE KERAMIK, DIE AUS DER FERNE KOMMT
UNE CÉRAMIQUE QUI VIENT DE LOIN

Ceramica del Conca S.p.a. è nata nel 1979 per iniziativa di una imprenditoria maturata in campo edilizio in Italia ed all'estero, nuova al mondo delle piastrelle ma sensibile alle evoluzioni tecnologiche, al design e alle crescenti aspettative del mercato. Fu tra le prime aziende del settore ceramico a credere nella monocottura smaltata su gres ceramico bianco, così come fu fra le prime ad impiegare la tecnologia del gres porcellanato. Dopo gli importanti investimenti degli ultimi anni, l'azienda ha avviato un nuovo piano industriale atto a sviluppare, da un lato, una superficie rivoluzionaria unica al mondo, presentata nel corso dell'anno 2021, con il nome Dinamika deep surfaces, e dall'altro, un ampliamento di capacità produttiva su uno dei segmenti più rappresentativi del Gruppo: il gres porcellanato 20 mm e 30 mm. L'azienda oggi è in grado di soddisfare, con le sue esclusive linee di prodotto, tutte le esigenze estetiche, qualitative e progettuali.

Ceramica del Conca S.p.a. was founded in 1979, based on experience in the construction sector in Italy and abroad. At the time, it was new to the world of ceramic tiles but had a great interest in technological development and design and was aligned with growing market expectations. It was one of the first companies in the ceramic tile industry to believe in glazed single-fired white body stoneware, and at times of general technical uncertainty, it was also one of the first to adopt the porcelain stoneware technology, making brave and valid production choices. Following major investments in recent years, the company has launched a new business plan aimed at both developing an original and revolutionary new surface, presented during 2021 with the name Dinamika Deep Surfaces, and at expanding the production capacity of one of the Group's most representative segments: 20 mm and 30 mm porcelain stoneware. The company can now satisfy all the aesthetic, quality and design requirements with its exclusive product lines.

Ceramica del Conca S.p.a. wurde 1979 basierend auf Erfahrungen in der Bauwirtschaft im In- und Ausland gegründet. Der neue Akteur in der Keramikbranche war stark an technischen Entwicklungen und Designtrends interessiert und stellte sich auf die gestiegenen Erwartungen des Marktes ein. Als einer der ersten Keramikhersteller setzte das Unternehmen auf weißscherbigen glasierten Einbrand und gehörte zu den ersten, die Feinsteinzeugtechnologie anwendeten. Nach den umfangreichen Investitionen in den letzten Jahren startete das Unternehmen zum einen ein neues Industrieprojekt für eine weltweit einzigartige, revolutionäre Oberfläche, die bereits 2021 unter dem Namen Dinamika Deep Surfaces vorgestellt wurde, und zum anderen erweiterte es die Produktionskapazität in einem der repräsentativen Segmente der Gruppe: Feinsteinzeug in den Stärken 20 mm und 30 mm. Das Unternehmen ist heute in der Lage, mit seinen exklusiven Produktlinien alle ästhetischen, qualitativen und planerischen Erfordernisse zu erfüllen.

Novice dans le monde des carreaux mais sensible aux évolutions technologiques, au design et aux attentes croissantes du marché, Ceramica del Conca S.p.a. a vu le jour en 1979, avec un esprit d'entreprise acquis dans le secteur du bâtiment en Italie et à l'étranger. Elle fut une des premières sociétés du secteur de la céramique à croire en la monocuison émaillée sur grès cérame blanc, et la première à utiliser la technologie du grès cérame, en effectuant avec détermination des choix valables en matière d'installation à une époque d'incertitude générale dans le domaine technique. Grâce aux investissements importants des dernières années, la société a mis en œuvre un nouveau plan industriel en mesure de générer, d'une part, une surface révolutionnaire unique au monde, présentée dans le courant 2021 sous le nom « Dinamika Deep Surfaces » et, de l'autre, une hausse de la capacité de production sur l'un des segments les plus représentatifs du groupe : le grès cérame 20 mm et 30 mm. Avec ses lignes de produits exclusives, la société est aujourd'hui en mesure de satisfaire toutes les exigences esthétiques, qualitatives et conceptuelles.

INNOVAZIONE E SPIRITO INTERNAZIONALE

INNOVATION AND INTERNATIONAL SPIRIT
INNOVATION UND INTERNATIONALER GEIST
INNOVATION ET ESPRIT INTERNATIONAL

Occorre attenzione, sensibilità e intelligenza per rimanere fedeli alla propria vocazione di "fare ceramica" nel miglior modo possibile. La consapevolezza di un patrimonio storico e artistico da cui attingere costantemente ispirazione e una visione aperta e partecipe sull'evoluzione del mondo contemporaneo, associate a creatività e ingegno, permette di sviluppare superfici ceramiche di qualità superiore, testimoni autorevoli della migliore cultura Made in Italy.

Un sistema produttivo completamente nuovo, frutto di una ricerca interna, ha portato allo sviluppo di un gres porcellanato evoluto e tridimensionale, con una perfetta sincronia fra grafica e struttura, per ricreare superfici fedeli alla natura e di grande impatto visivo, mantenendo tutte le caratteristiche della materia gres: resistenza all'usura, agli agenti atmosferici e facilmente pulibile, idoneo anche agli ambienti esposti a forti sollecitazioni esterne.

Great attention, sensitivity and intelligence are necessary to remain faithful to the vocation of "making" ceramic tiles in the best possible way. The awareness of a historical and artistic heritage, from which to constantly draw inspiration, an open and active vision of the evolution of the contemporary world, associated with creativity and originality, are the driving force behind the development of superior quality ceramic surfaces, that truly represent high quality Italian design culture.

A completely new production system, based on in-house research, has led to the development of an advanced and three-dimensional porcelain stoneware, perfectly harmonious in terms of its patterns and structure, to recreate natural-looking and highly striking surfaces, maintaining all the characteristics of stoneware: resistance to wear and the elements, easy to clean, and also suitable for spaces exposed to heavy external stress.

Hohe Aufmerksamkeit, Aufgeschlossenheit und Intelligenz sind erforderlich, wenn man seinem Ziel, auf bestmögliche Weise Keramikbeläge zu fertigen, treu bleibt will. Das Bewusstsein eines historischen und künstlerischen Erbes, das kontinuierlich als Inspirationsquelle dient, eine aufgeschlossene Einstellung gegenüber dem Wandel der modernen Welt, verbunden mit Kreativität und Einfallsreichtum sind die Basis für die Entwicklung von Oberflächen höchster Qualität, die repräsentativ für die italienische Designkultur sind. Das intern entwickelte, vollkommen neue Produktionssystem ermöglicht die Herstellung von hochmoderinem Feinsteinzeug mit dreidimensionalem Effekt. Grafiken und Strukturen sind perfekt aufeinander abgestimmt, so dass naturgetreue, durch prägnante Optik bestechende Oberflächen entstehen, die gleichzeitig alle Vorteile von Feinsteinzeug besitzen: Verschleißfestigkeit, Witterungsbeständigkeit und Pflegeleichtigkeit. Dadurch ist dieses Material auch für Bereiche geeignet, die starken äußeren Beanspruchungen ausgesetzt sind.

Pour rester fidèle à la vocation pour la fabrication de la céramique de la meilleure façon possible, il faut faire preuve d'attention, de sensibilité et d'intelligence. La conscience d'un patrimoine historique et artistique dans lequel on puise constamment l'inspiration ainsi qu'une vision ouverte et participative sur l'évolution du monde contemporain, associées à la créativité et au génie, permet de développer des surfaces en céramique d'une qualité supérieure, qui sont les meilleurs témoins de la culture Made in Italy. Un système de production complètement nouveau, fruit d'une recherche interne, a abouti à la création d'un grès cérame tridimensionnel d'avant-garde, avec une synchronie parfaite entre graphisme et structure, de sorte à réaliser des surfaces fidèles à la nature et de grand impact, tout en conservant les caractéristiques du grès : résistance à l'usure et aux agents atmosphériques, facilité de nettoyage, applicabilité aussi dans les lieux exposés à de fortes contraintes externes.

FOCUS ON THE ENVIRONMENT AND PEOPLE'S WELL-BEING
AUFMERKSAMKEIT GEGENÜBER DER UMWELT UND DER WELT
L'ATTENTION PORTÉE À L'ENVIRONNEMENT ET AU MONDE

Il rispetto dell'ambiente, delle risorse naturali e il contenimento dei consumi energetici è da sempre un obiettivo che l'azienda segue con costanza e attenzione, per fornire ai propri clienti un prodotto che, oltre ad avere caratteristiche estetiche e tecniche di elevato livello, sia realizzato secondo criteri di sostenibilità. La politica ambientale è attuata attraverso la sensibilizzazione dei propri dipendenti e fornitori verso i temi di ecologia e di risparmio energetico. Il completo riutilizzo interno delle acque industriali prodotte durante il ciclo di lavorazione proprio e di terzi, la riduzione delle emissioni di CO₂ in atmosfera in linea con quanto richiesto dal Protocollo di Kyoto, il recupero nel ciclo produttivo di tutti gli scarti di produzione non cotti e una gestione differenziata dei rifiuti sono i principali elementi alla base di una filosofia attenta all'ambiente e al benessere delle persone.

Respect for the environment and natural resources, combined with attention to energy consumption, has always been a key goal which the company pursues constantly and with care. The aim is to offer customers a product that not only has high quality technical and aesthetic features but that is also manufactured according to sustainability criteria. The environmental policy is implemented by raising the awareness of employees and suppliers on ecology and energy saving issues. The company's environmental philosophy is attentive to the environment and to people's well-being and is based on the complete internal re-use of the industrial water produced during the company and third-party's processing cycles, the reduction of CO₂ emissions into the atmosphere in line with the requirements of the Kyoto Protocol, the recovery in the production cycle of all non-fired production waste and correct waste management.

Die Umweltschutzhaltung wird durch die Sensibilisierung der eigenen Beschäftigten und Lieferanten gegenüber Themen der Ökologie und der Energieeinsparung angewandt. Die vollständige interne Wiederverwendung des während des eigenen und bei Dritten erfolgenden Bearbeitungszyklus entstehenden Brauchwassers, die Reduzierung der CO₂-Emissionen in die Atmosphäre gemäß den Forderungen des Protokolls von Kyoto, die Rückgewinnung aller ungebrannten Produktionsabfälle im Produktionszyklus und eine getrennte Abfallentsorgung sind die wichtigsten Elemente, die die Grundlage einer auf die Umwelt und das Wohlbefinden der Personen bedachten Philosophie bilden.

Le Groupe Del Conca est depuis toujours actif dans le social également grâce à la Fondation Cino Mularoni, dont l'objectif est la mise en œuvre d'événements de caractère culturel et scientifique, en favorisant les études et les recherches, en contribuant à la formation de jeunes chercheurs et au soutien de différentes initiatives éditoriales.

Le Groupe Del Conca utilise des ressources humaines et économiques pour promouvoir de nombreuses activités philanthropiques, en obtenant des résultats concrets dans le domaine humanitaire avec des projets de solidarité dans le monde entier. Depuis le premier projet réalisé en Indonésie en 2008, on considère que l'instruction et la santé constituent la base d'un développement social et économique de tous les pays les plus pauvres du monde et depuis, nous nous sommes engagés dans ce sens, en construisant des écoles, des maisons d'accueil, des réseaux de distribution de l'eau, des centres sanitaires et des services d'hôpitaux. Nous soutenons également la population italienne fortement frappée par les séismes de 2012 et 2016.

Dinamika ist die technische

beeindruckend hervorgehoben,
um die einzigartige realistische

Dinamika

Travertino

Dinamika riedita la pietra sedimentaria Travertino dando vita a una superficie intensa e palpante. Piccole inclusioni di fossili animali e vegetali costruiscono un tessuto di materie stratificate ed elaborate nel tempo dove la perfetta sincronia tra struttura e grafica conferisce un risultato iperrealistico.

Dinamika ist eine Nachempfindung des Sedimentgestein Travertin und wartet mit einer beeindruckend lebhaften Oberfläche auf. Kleine Einschlüsse von Tier- und Pflanzenfossilien ergeben ein Gefüge aus Stoffen, die sich im Laufe der Zeit schichtweise abgelagert haben. Durch die perfekte Übereinstimmung zwischen Optik und Struktur entsteht ein äußerst realistisches Erscheinungsbild.

Dinamika reinterprets sedimentary travertine stone in a surface that seems to throb with life. Small inclusions of animal and plant fossils construct a fabric of matter, layered and perfected by time, where the flawless synchrony of structure and graphic design creates a hyper-realistic impression.

Dinamika repropose le travertin, pierre sédimentaire, avec une surface intense et palpante. De petites inclusions d'animaux et de plantes fossiles tissent des matières stratifiées qui se forment au fil du temps, où la synchronie parfaite entre structure et graphique aboutit à un résultat hyperréaliste.

Breccia Grey

Un effetto materico carico di vitalità caratterizza una superficie dalla colorazione grigia su cui leggere venature bianche capaci di disegnare percorsi sempre diversi. Dinamika si basa sul connubio tra estrema precisione tecnica e sapere umano per generare una varietà grafica infinita che il passaggio della luce riesce a cogliere nella sua naturalezza.

Eine lebhafte Materialoptik kennzeichnet eine graue Oberfläche, auf der sich zarte weiße Äderungen in immer unterschiedlichen Verläufen wahrnehmen lassen. Dinamika basiert auf dem Zusammenspiel zwischen höchster technischer Präzision und menschlichem Know-how. Das Ergebnis ist eine strukturelle Vielfalt, deren natürliche Ausstrahlung durch das Licht erfasst wird.

A material look of vibrant vitality, with a grey surface criss-crossed by constantly different, exquisitely subtle white veins. Dinamika combines extreme technical precision with human know-how to generate an endless variety of graphic design, its natural beauty fully revealed by the light.

Un effet matière regorgeant de vitalité caractérise une surface à la coloration grise, sur laquelle admirer des veines blanches capables de dessiner des parcours toujours différents. Dinamika repose sur l'alliance entre précision technique extrême et savoir-faire humain pour générer une infinité de variétés graphiques, traduites dans toute leur spontanéité par le passage de la lumière.

Pietra Pece

Caratterizzata da una variazione cromatica unica che va dal grigio al marrone scuro, Pietra Pece è l'interpretazione di una superficie trattata con polveri e pigmenti scuri di diverse granulometrie per creare effetti di alto e bassorilievi. Una materia dalla tridimensionalità esclusiva che invade i sensi e la cui valenza tattile diventa elemento distintivo di Dinamika.

Pietra Pece zeichnet sich durch besondere Farbverläufe von Grau bis Dunkelbraun aus und ist die Interpretation einer plastischen Oberfläche mit Hoch- und Flachreliefs, die durch die Behandlung mit dunklen Pulvern und Pigmenten verschiedener Korngrößen erzielt wurde. Ein Material mit exklusiver Tiefenoptik, das die sinnliche Wahrnehmung anregt und dessen haptische Wertigkeit zum kennzeichnenden Element von Dinamika wird.

Uniquely coloured with hues varying from grey to dark brown, Pietra Pece evokes a surface treated with dark powders and pigments of different particle sizes to create high and bas-relief texturing. An exclusive three-dimensional material that invades the senses, giving Dinamika an original tactile allure.

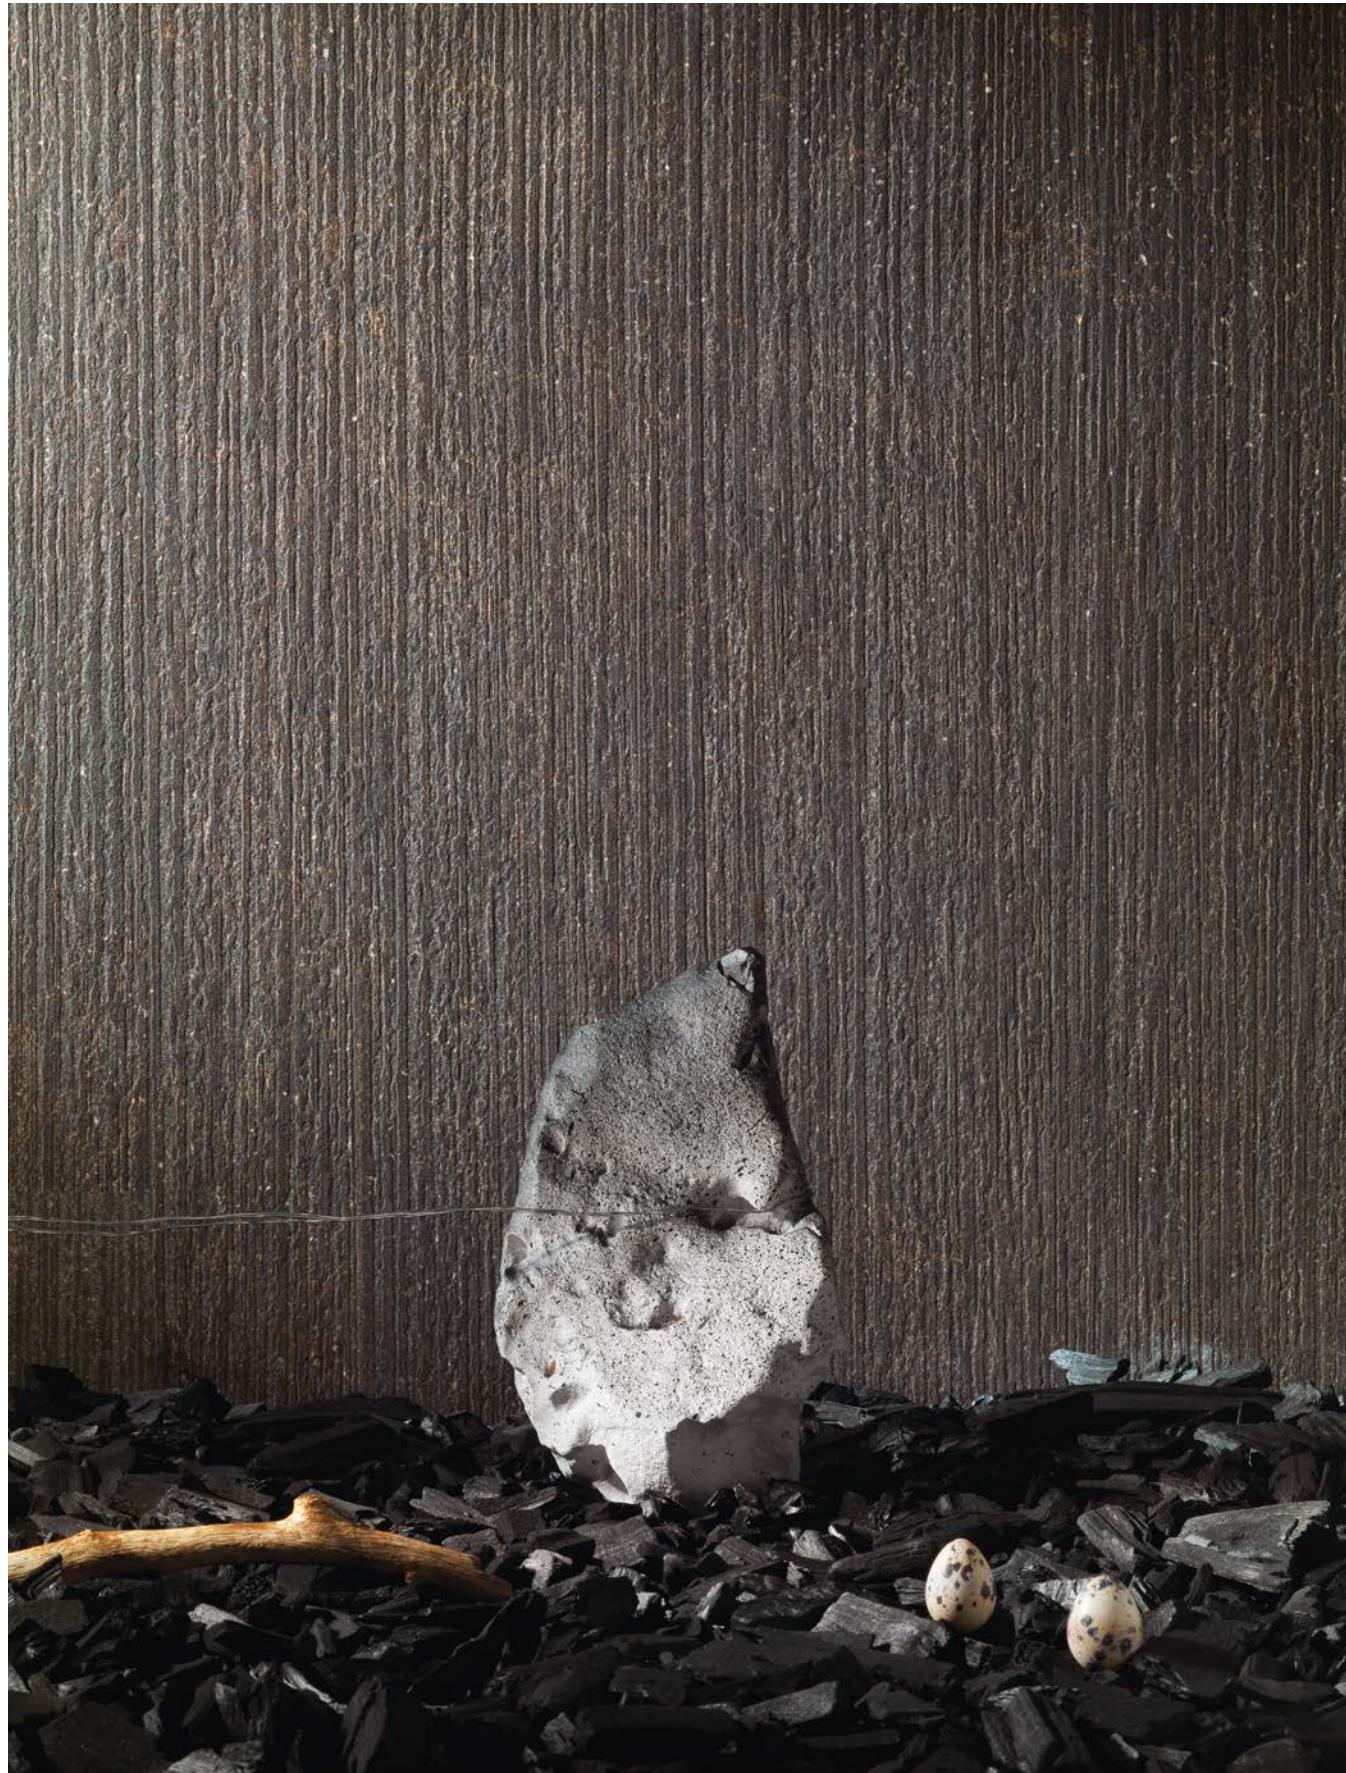

Caractérisée par une gamme exceptionnelle de tonalités allant du gris au marron foncé, Pietra Pece interprète une surface traitée avec poudres et pigments foncés de différentes granulométries pour créer des effets de hauts et bas-reliefs. Une matière à la tridimensionnalité exclusive qui séduit les sens et dont la valeur tactile devient le trait distinctif de Dinamika.

Il decoro è stato realizzato con oro giallo e materie metallizzate pertanto il fondo decorato può essere posato solo a parete. Il decoro non è resistente all'usura da sfregamento sia in fase di posa che post posa. Per la pulizia quotidiana si consiglia di utilizzare un panno umido impregnato di acqua o prodotti neutri.

The decoration was created with yellow gold and metallised materials and therefore the decorated background tiles can only be laid on walls. The decoration is not resistant to rubbing wear either during installation or post installation. For daily cleaning, it is advisable to use a wet cloth soaked in water or neutral detergents.

Das Dekor wurde mit Gelbgold und metallisierten Materialien hergestellt, deshalb kann die dekorierte Bodenfliese nur an der Wand verlegt werden. Das Dekor ist sowohl bei der Verlegung als danach gegen Scheuern nicht abnutzungsbeständig. Zur täglichen Reinigung wird geraten, ein feuchtes, mit Wasser oder neutralen Reinigungsmitteln imprägniertes Tuch zu verwenden.

Le décor a été réalisé avec de l'or jaune et des matières métallisées; par conséquent, le fond décoré ne peut être posé que sur le mur. Le décor n'est pas résistant à l'usure par frottement pendant et après la pose. Pour le nettoyage quotidien, nous recommandons d'utiliser un chiffon humide imprégné d'eau ou de produits neutres.

Nuove superfici ceramiche prendono forma in accordo con la natura. La ceramica è design al servizio dell'uomo. Del Conca progetta e costruisce un sistema di arredi per interni ed esterni ispirandosi alla natura, ai suoi elementi. Lavabi, tavoli, sedute, top e ampi piani di lavoro sono realizzati con grandi lastre in gres porcellanato dallo spessore sottile, una tecnologia che consente lavorazioni originali nell'ambito dell'interior design. Superfici interconnesse, da cui nascono piani e volumi traslati tra loro nello spazio per disegnare forme nuove ed esclusive.

New ceramic surfaces take shape according to nature. The ceramic material is design at the service of man. Del Conca designs and constructs a system of indoor and outdoor furnishings taking its inspiration from nature and the elements. Washbasins, tables, seats, counters and large work surfaces made from large, slimline porcelain stoneware slabs, a technology that brings original craftsmanship to the field of interior design. Interconnected surfaces that create planes and volumes which are mixed and matched in the space to design new, one-of-a-kind styles.

Neuartige keramische Oberflächen im Einklang mit der Natur – das ist Design im Dienste der Menschen. Del Conca entwickelt und fertigt ein Einrichtungssystem für Innen- und Außenbereiche, das sich von der Natur und allen ihren Elementen inspirieren lässt. Mit großen Feinsteinzeugplatten in geringer Stärke ausgeführte Waschbecken, Tische, Sitzelemente, Waschtische und großzügige Arbeitsplatten – eine Technologie, mit der sich originelle Projekte für die Innenraumgestaltung umsetzen lassen. So können miteinander verbundene Oberflächen geschaffen werden, die Ebenen und Bereiche mit fließenden Übergängen und neuen exklusiven Formen entstehen lassen.

Del Conca s'inspire de la nature et de ses éléments pour imaginer et pour réaliser son système déco intérieur et extérieur. Lavabos, tables, assises, plans de toilette et grandes surfaces de travail sont fabriqués avec de grandes dalles en grès cérame de fine épaisseur, une technologie qui permet de mettre en œuvre des façonnages originaux en décoration d'intérieur. Des surfaces interconnectées à partir desquelles apparaissent plans et volumes qui se déplacent dans l'espace pour dessiner des formes nouvelles et exclusives.

CARATTERISTICHE TECNICHE E NORME INTERNAZIONALI TECHNICAL CHARACTERISTICS AND INTERNATIONAL STANDARDS TECHNISCHE MERKMALE UND INTERNATIONALE NORMEN CARACTERISTIQUES TECHNIQUES ET NORMES INTERNATIONALES

Le nostre piastrelle di 1^a scelta sono prodotte e scelte in base alla normativa europea EN ed internazionale ISO. Questa significa che il 95% delle piastrelle contenute nelle confezioni di prima scelta devono avere caratteristiche d'aspetto conformi alla norma; pertanto non devono essere perfette (cosa impossibile per un qualunque prodotto industriale) ma devono avere delle tolleranze contenute entro i limiti della norma. Queste tolleranze e quelle relative alle altre caratteristiche fisiche e chimiche del prodotto sono riportate in calce. La valutazione dell'aspetto della piastrella deve essere fatta osservandola perpendicolarmente da 1 m. di distanza. I difetti delle piastrelle possono essere di due tipi: palesi (visibili già prima della posa, come differenza di tonalità, difetti di superficie, rotture, ecc.) o occulti (non visibili prima della posa). I difetti palesi vanno contestati solo prima della posa. Questo consente al produttore di sostituire eventualmente il materiale difettoso. Qualora l'acquirente o l'installatore decidano comunque la messa in opera, la responsabilità del produttore decade. La responsabilità per difetti occulti, purché contestati entro i termini di legge, è del produttore.

Our 1st choice tiles are manufactured and selected according to European EN and International ISO regulations. This means that 95% of the contents of first choice must have appearance characteristics corresponding to the standards. Therefore they must not be perfect (which is impossible for any industrial product) but must have tolerances comprised within the standard limits. These tolerances and those concerning the other physical and chemical characteristics of the product are reported below. The appearance valuation of the tile must be done examining it (perpendicularly) from 1 meter of distance. Defects of tiles can be of two types: noticeable (already visible before laying, such as color differences, surface defects, fractures, etc.) or hidden (not visible before laying). Complaints about noticeable defects may be made only before tiles are laid, allowing the producer to replace any faulty material. However, if the buyer or tile layer decides to proceed with laying, the responsibility of the producer is invalidated. Responsibility for hidden defects, if these are notified within the legal time limits, lies the producer.

Tech Info

Unsere Produkte in 1. Sortierung entsprechen den Europäischen EN- und den internationalen ISO-Normen. Dies bedeutet, daß 95% des Inhaltes einer als "erste Wahl" deklarierten Verpackungseinheit im Aussehen der Norm entsprechen sollen, also nicht perfekt sein müssen (unerreichbar für jegliches industriell hergestellte Produkt), jedoch Toleranzen innerhalb der von der Norm vorgelegten Limite aufweisen dürfen. Diese Toleranzen, sowie jene bezogen auf weitere physikalische und chemische Eigenschaften des Produktes werden nachfolgend aufgeführt. Das Aussehen der Fliesen sollte beurteilt werden wenn man sie in 1 m. Entfernung in Senkrechter position betrachtet. Fliesen können Mängel zweierlei Typs aufweisen: offensichtliche, schon vor dem Verlegen zu bemerkende Mängel, wie Tonalität-differenzen, Oberflächenfehler, Bruch usw... sowie versteckte, nicht vor der Verarbeitung zu bemerkende Mängel. Offensichtliche Mängel sind vor dem Verlegen zu beanstanden. Dies erlaubt dem Hersteller eventuell das Mängel aufweisende Material zu ersetzen. Sollten der Käufer oder der Fliesenleger sich dennoch für eine Verlegung des zu bemängelnden Materials entscheiden, entfällt die Verantwortung des Produzenten. Verantwortung für versteckte Mängel trägt der Hersteller, jedoch nur bei Beanstandung im Rahmen der gesetzlichen Fristen.

Nos carreaux de 1^a choix sont produits et choisis en fonction des normes européennes EN et des normes internationales ISO. Ceci signifie que 95% des carreaux contenus dans les conditionnements de 1^a choix doivent avoir les caractéristiques d'aspect conformes aux normes. Ils ne doivent donc pas être parfaits (chose impossible pour tout produit industriel) mais ils doivent avoir des tolérances contenues dans les limites des normes. Ces tolérances et celles relatives aux autres caractéristiques physiques et chimiques du produit sont reportées ci-dessous. L'évaluation de l'aspect du carreau doit être faite en observant celui-ci (perpendiculairement) à un mètre de distance. Les défauts des carreaux peuvent être de deux types: visibles (déjà avant la pose, comme différences de tonalité, défauts de surface, rupture, etc...) ou cachés (non visibles avant la pose). Les défauts visibles ne peuvent être contestés qu'avant la pose. Ceci permet au producteur de remplacer éventuellement le matériel défectueux. Au cas où l'acheteur ou le carreleur décident quand même l'installation, le producteur n'est plus responsable. La responsabilité pour défauts cachés est celle du producteur, à condition que la marchandise soit contestée dans les délais légaux.

CONSIGLI PER L'IMPIEGO • RECOMMENDATIONS FOR USE • EMPFEHLUNGEN FÜR DEN GEBRAUCH • CONSEILS POUR L'EMPLOI

I risultati delle prove di laboratorio non sono sufficienti a determinare la durata di un pavimento. A parità di calpestio essa è influenzata oltre che dalle caratteristiche tecniche del prodotto, anche dal luogo di impiego e della maggiore o minore presenza di sostanze abrasive. Pertanto consigliamo di scegliere il prodotto con le caratteristiche di resistenza all'usura sufficienti all'utilizzo in base allo schema che segue ma anche di proteggere, ad esempio con l'utilizzo di zerbini, i pavimenti dalla presenza di sabbia o sostanze graffianti.

No laboratory test, however efficient it may be, is sufficient to determine the durability of a product. Apart from the obvious factor of the number of foot contacts, durability can also be influenced by the technical characteristics of the product, the place of installation and the possible presence of abrasive agents. We therefore recommend not only that products should be chosen with resistance characteristics that are sufficient for the intended use, as shown in the following chart, but also that wherever necessary, floors should be protected against sand, grit and other abrasives by the use, for example, of mats.

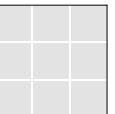

Die Resultate von Laborversuchen reichen nicht aus, um die Lebensdauer eines Fußbodens zu bestimmen. In gleichem Maße wie durch Begehung, ist er - außer durch die technischen Charakteristiken des Produktes - auch durch den Verwendungsort und die dort vorhandene größere oder geringere Menge schleifender Substanzen beeinflußt. Deshalb empfehlen wir die Auswahl des Produktes nach solchen Haltbarkeitscharakteristiken, wie sie das folgende Schema darlegt, und außerdem, die Fußböden z. B. durch Gebrauch von Fußmatten vor Sand oder kratzenden Substanzen zu schützen.

Les résultats des essais de laboratoire ne peuvent à eux seuls déterminer la durée d'un pavement. A parité de passage, celle-ci, outre à dépendre des caractéristiques techniques du produit, dépend aussi du lieu d'emploi et de la présence plus ou moins importante de substances abrasives. Pour cela, nous conseillons de choisir le produit présentant des caractéristiques de résistance à l'usure en rapport avec l'utilisation à laquelle il est destiné sur la base du schéma reporté ci-après et de protéger les pavements, à l'aide de paillassons ou autre, du sable ou de toute substance pouvant les rayer.
