Fatto secondo natura

MADE THE NATURAL WAY
GESCHAFFEN NACH DEM VORBILD DER NATUR
FAIT D'APRÈS NATURE

Una materia naturale, essenziale e calda. Un'armonia di pace, equilibrio si diffonde negli spazi grazie a queste terre pressate e ad una texture leggera, materica per lasciare spazio ai colori naturali. Nuance pastellate accompagnano marmi, legni, brick, e maioliche in una scena personale, intima.

A natural, simple, warm material. Add peace and a tasteful harmony to design schemes with these pressed earths and a light, tactile texture that enhances natural colours. Pastel shades blend perfectly with marble, wood, brick and majolica in individual, intimate interiors.

Ein natürliches, schlichtes und warmes Material. Ein Gefühl von Frieden und Harmonie breitet sich in den Räumen aus, dank dieser gepressten Erde und einer leichten, materialbetonten Textur, die den natürlichen Farben genug Raum lässt. Pastelltöne in Kombination mit Marmorsteinen, Hölzern, Bricks und Majoliken in einer persönlichen, vertrauten Atmosphäre.

Un matériau naturel, pur et chaud. Les espaces sont empreints d'une harmonie de paix et d'équilibre grâce à ces terres compactées, dont la matière légèrement texturée laisse affleurer les couleurs naturelles. Des nuances pastel accompagnent marbres, bois, briques et faïences sur une scène personnelle et intime.

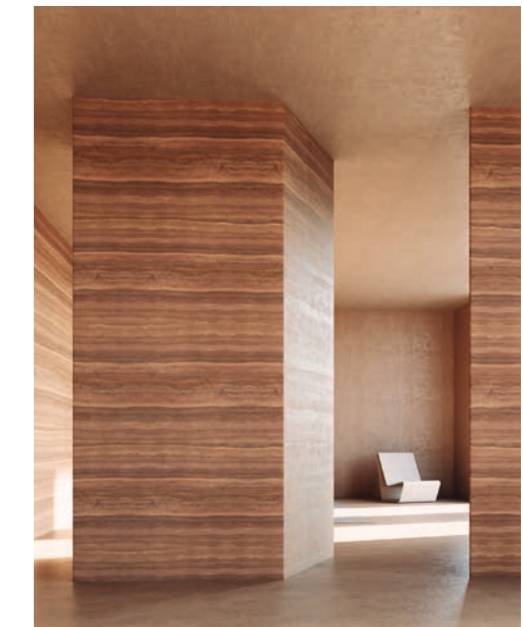

INSPIRATION

Terre e architettura, da sempre unite

EARTH AND ARCHITECTURE, INSEPARABLE THROUGH THE AGES
ERDE UND ARCHITEKTUR, SEIT JEHER VEREINT
TERRES ET ARCHITECTURE, UNE UNION IMMÉMORIALE

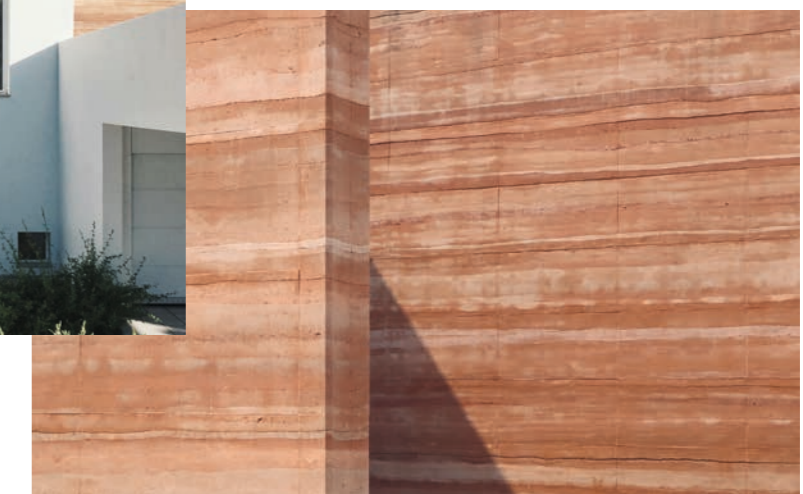

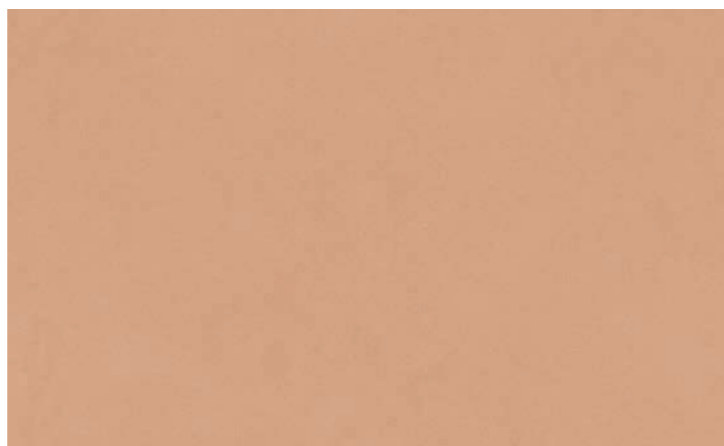

Da millenni, terra e architettura vivono a contatto per creare elementi di costruzione. Ispirandoci alla tecnica del pisé nasce la superficie decorata Stratum, un equilibrio di cromie calde o fredde, per rappresentare strati di terre pressate fra loro.

Architecture has shaped earth to create construction materials since time out of mind. The ancient pisé, or rammed earth, technique now inspires the Stratum decorated surface, with warm or cool shades attractively combined to evoke layers of pressed earth.

Seit Jahrtausenden sind die Erde und die Architektur in engem Kontakt miteinander und erzeugen Bauelemente. Inspiriert von der Pisé-Technik entsteht die gemusterte Oberfläche Stratum, eine Harmonie aus warmen oder kalten Farbtönen, die zusammengepresste Erdschichten darstellen.

Depuis des millénaires, terre et architecture vivent en contact pour créer des éléments de construction. Inspirée de la technique du pisé, la surface décorée Stratum est née : un équilibre de couleurs chaudes ou froides pour représenter les couches de terre compactées entre elles.
